The new SIS grade book is a web application that has been designed to minimize the need to go back to the database for information. For data entry, it does increase the possibility of data loss. If you change from one screen to another without saving you will lose all of the work you have entered on that screen since you last saved. Make sure that you save your work before switching to a different class, a different screen, or changing the Show Inactive/Hide Inactive status!

When the web page refreshes and you have not saved the data you just entered, the data will be lost.

The Web \$\sist\$2000+ Grade Book \(\leftleftharpoonup \) \(\leftleftharpoonup \)

Introduction

The grade book focus has been to allow teachers easy set up and navigation in the grade book. The grade book was created with teacher usage in mind for simple, fast, and accurate data entry. Subject Templates are used to simplify initial setup from term-to-term and from year-to-year. Citizenship is based on positive and negative incidents called Citizenship Items. Entering and editing scores is fast and convenient with the spreadsheet-like screen.

When navigating in a web browser, the user must always save the data entered by clicking on the save button or the data entered will be lost. Even the screen refreshing without saving data entered will be lost. Remember to always save data before navigating away from the screen.

Security \rightarrow

To keep the data secure, login sessions will time out when left idle for several minutes. If the session times out and data entered has not been saved, the data will be lost.

Logging In \rightarrow

The SIS2000+ Grade Book is accessed using a web browser. Ask your local SIS specialist for the URL for your school.

1. Login using your regular SIS login ID number preceded by the letter 'F' and your confidential SIS password (F 383). The letter 'F' signifies faculty user.

The attendance entry screen shows two calendar weeks with the current day (the date you select) in the middle of the screen. The spreadsheet-like screen allows you to easily move from cell-to-cell to enter or edit attendance codes. The top cell of the date you select will initially be selected for editing. The software will not allow you to type an invalid code. Attendance codes are set up by the office. Navigation arrows allow you to move forward or backward in two-week increments until you enter or change a student's attendance code. You will need to save the data entered or data changed before leaving the screen.

Setting up the Grade Book

Academic → **Define Subject Template**

The Subject Template is used to define specific grading parameters. Once the template has been saved it may be copied to multiple classes and it will remain available from term-to-term and from year-to-year.

Academic → **Define Subject Template:**

- 1. Select Academic on the menu bar or the Define Subject Template icon
- 2. Select Define Subject Template

Prior to defining the Subject Template Definition you must answer a few basic questions:

- 1. What will I call the Subject Template Definition? (It can be a generic name such as Academic).
- 2. Do I want a sort order for the Subject Template Definition? (This is if you have more than one Subject Template Definition)
- 3. Will I use category weighting to calculate grades? (Optional, if yes, put a check mark in the box).
- 4. If I plan to use category weighting, what percentage will each category have? (They should total 100.)
- 5. How many Category Titles will I use? (You must have at least one).
- 6. What will my Category Titles be named? (They can be generic names such as Assignments, Tests, Lab Work. Generic Category Titles can be copied to every class)
- 7. In what order do I want my Category Titles to appear? (optional)
 Enter a number for each Category Title to indicate the sort order (1, 2, 3) or you can leave the sort order blank.
- 8. Do I want to set up score dropping for any of my categories? (optional) If score dropping is checked for a given category, the system dynamically excludes the lowest score(s) that will hurt the student's mark the most.
 - i. Check the Drop Lowest checkbox if you want to use this feature
 - ii. Enter the number of scores to drop
 - iii. Enter how many scores are needed before dropping a score
- 9. What Mark Set grading scale will I use? The Mark Set is usually decided by the administration. Select a Mark Set from the drop-down list (ask your school registrar/secretary which Mark Set to use)

If you are allowed to modify the Mark Set:

- a. Uncheck the marks you don't want to use
- b. Enter your Mark Set grading scale

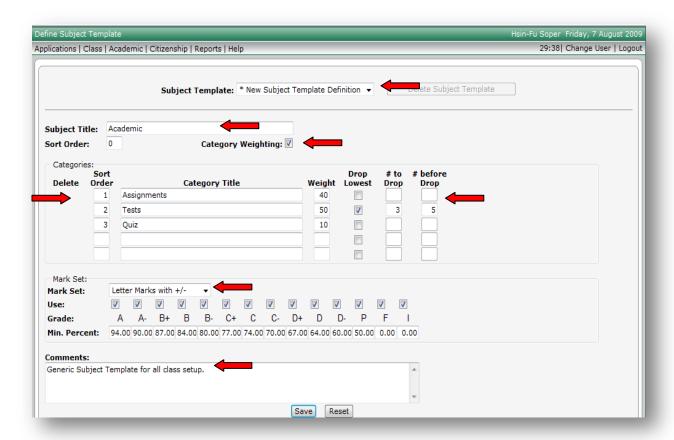

Academic Marks → **Definition**

Academic marks are calculated with or without category weighting. Blank cells are not included in the calculation but zeros are. Blank cells indicate a student wasn't enrolled in class to hand in the assignments. Ignored scores are not included in the calculation. If category weighting is being used and one or more categories are empty, a reasonably accurate mark will be calculated based upon the categories that have scores. If there is not enough score information to calculate a mark, no mark will be shown. Extra credit is defined simply as points above points possible (points possible can be zero). A student may earn more than 100% overall.

- 10. The Comments box is for teacher view only and does not print anywhere. These comments are about the subject template and may give teacher instruction or reminders about a particular subject template. These comments are optional.
- 11. Click Save to store your template.

To define the Subject Template Definition:

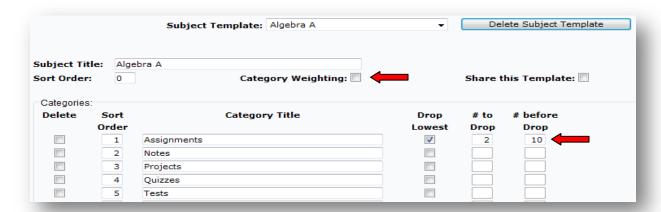

- 1. Select Academic on the menu bar or the Define Subject Template icon
- 2. Select Define Subject Template
- 3. Type the name of your Subject Title
- 4. Select the sort order for the Subject Template Definitions if you will have more than one defined (optional)
- 5. Select Category Weighting (optional)
- 6. Name the Category Titles
- 7. Select the sort order of the Category Titles (optional)
- 8. If you selected Category Weighting, you will need to setup the weight of each Category Title
- 9. Select Drop Lowest -- for dropping student lowest scores (optional)
- 10. Select # to Drop --- for dropping student lowest scores (optional)
- 11. Select # before Drop -- for dropping student lowest scores (optional)
- 12. Select the grading Mark Set
- 13. Type in Comments (Optional) Subject Template comments are only viewed by the teacher and not printed
- 14. Click Save

Important Grade Book setup information:

There are an unlimited number of ways teachers can setup their grade book.

During the design, programmers tried to make the setup as easy as possible.

Since 'Dropping Scores' is defined by category, the software will drop the score that increases the category mark. It is possible when dropping a lowest score to have a situation where dropping one score is better for the category mark and dropping another score is better for the subject mark. This situation will only happen when a teacher has not chosen to do category weighting, has a wide range in the amount of points possible within a category, and has given large amounts of extra credit. Thus the calculation could drop 100 points out of 100 points rather than 3 points out of 8 points. A parent looking at this would wonder why this happened and think the grade book isn't working correctly when in fact it is.

Dropping scores is designed to allow a teacher to forgive one low score of a certain type (aka, category). The results are easy to explain: when a category score is dropped, it will increase the mark (student grade) within that category. This result is not necessarily meant to forgive a lack of work in another category.

It should also be noted that because of the grade book flexibility, the teacher is able to accomplish the desired results by marking: 'do not drop' on the score they didn't want dropped.

Teachers also need to evaluate the subject percentage instead of the category percentage when dropping lowest scores in the grade book that does not use category weighting. Caution should be used when choosing this option because; it may be harder to explain to parents because the grade book will act differently depending on how it is setup, and it will allow scores in one category to overcompensate for low scores in a different category.

Please remember, setting up the grade book as simple as possible will be your best route for parents to understand the results.

Citizenship By Item screen

Citizenship marks are based upon an accumulation of Citizenship Items to which are assigned positive or negative values. Each student begins with a preset starting value set by the teacher. When a student has a Citizenship Item added to their Citizenship Log, the assigned value is subtracted or added to the default value to determine the student's citizenship mark. If there is no Citizenship Item given to the student(s), the starting default value determines the citizenship mark awarded the student without the teacher needing to do anything beyond the initial Citizenship setup. The citizenship marks can be overridden in \rightarrow Academic \rightarrow Score Entry \rightarrow Grades tab screen.

Academic → **Student Scores**

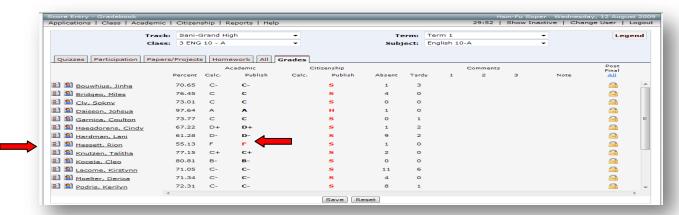

The student scores screen allows you to focus on all of the Tasks (assignments) information by class for an individual student.

The Student Scores screen is the perfect screen for student and parent viewing for discussing student score(s) with the individual student or with her/his parents. It is student specific for confidentiality.

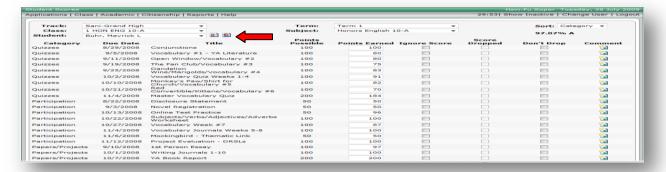

This screen also allows you to edit scores, mark a given Task to Ignore Score Dropped, or Don't Drop specifically for the student, and write a comment about a specific Task for the specific student. The screen will display the student's mark by class, but the mark will not be recalculated if you change or add scores until you save your work. Always save the edited Tasks before student or parent viewing to make sure the mark has been recalculated.

If you are adding scores or editing scores and the mark for the student doesn't change after saving the changes, the student could have an overridden mark. Overridden marks will not recalculate or include newly added score changes on an individual student's scores unless you return the overridden mark back to calculated. For instruction to return a student's score back to calculated turn to page 55.

You can define a single Task if you are on a category tab (not in the All or Grades tabs). Another blank column will appear after you click Save to allow you to add another Task. Note: An editable text box allowing for individualized student comments which are included on the Student Grade book screen as well as printed on the Report Cards. Notes do not print on Progress reports.

Post Final - ALL: Post Final is used to Publish/Finalize/Store student marks. A checkbox for posting a student's mark to history will post marks after selecting All or one student at a time and **saving**.

Academic \rightarrow Post \bigcirc Final - All

Occasionally the office will instruct you to post your marks so that mid-term or end of term report cards can be printed and distributed. This can be done as frequently as the school administration requires. The marks should be posted at the end of every term whether or not the office will be printing student report cards. Marks not posted will not show on report cards and be lost when the school year is over and the database has been rolled over for the start of the next school year. These marks are not retrievable. Students will lose not just the mark for the class but also the credit awarded for the class and could affect graduation credit.

To Post Final marks → Publish/Finalize/Store marks:

- 1. Select Academic on the menu bar
- 2. Select Score Entry
- 3. Select the Term
- 4. Select the Class
- 5. Select the Grades tab (this is the only place you can post or view class or individual student posted marks)
- 6. Check the checkbox next to each student(s) name that is to be posted to Final or click All if you want all students' marks Posted to Final
- 7. Click Save

You will need to select each and ALL individual classes for each class for posting student marks

Once the marks are posted to Final, you will see the status information change on the screen.

Academic → **Review Posted Final** Marks

Teachers need to always check each term to make sure all class marks have been Posted. Posted marks will show a padlock in the Score Entry screen in the Grades tab by each student name. If a student's mark hasn't been posted, their name will not have a padlock by it. You need to select the student's name to be posted and save to post all student marks. Each class must be selected one at a time and checked to make sure all student marks have been posted.

To review posted marks:

- 1. Select Academic on the menu bar
- 2. Select Score Entry in the drop-down menu
- 3. Select the Term
- 4. Select the Class
- 5. Select the Grades tab (this is the only place you can post marks or view your posted marks)
- 6. Repeat this for <u>all</u> classes in the term and make sure all student marks are posted

Marks will be red if it is an overridden mark. Drop-down options disappear and a lock icon appears in place of the Post Final checkbox.

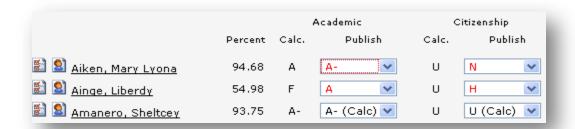

If changes need to be made to marks after Posting Final, if a padlock shows on the mark needing changed, users need to ask the office or administration to unlock the posted marks. After editing the marks, the teacher will need to post the mark again, making sure a padlock shows again.

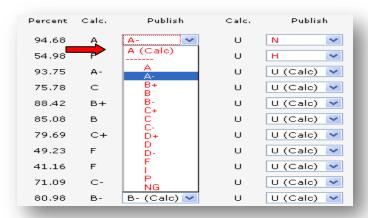

Academic → Score Entry → Grades Tab -- Overridden Marks

On the Grades tab, users may override any calculated mark by choosing a mark from the drop-down menu and saving the change. Overridden marks will appear in red. On an individual student, an overridden mark will not recalculate and include newly added score changes that are added after a teacher has given a student an overridden mark unless the teacher returns the overridden mark back to calculated. This is critical to remember!

Academic → Score Entry → Grades Tab -- Calculated Marks

The top option in the drop-down menu picture below displays the calculated mark ... (Calc).

Selecting the calculated mark ... (Calc) resets the overridden mark back to the calculated mark ... (Calc).

Any mark ... (calc) can be selected to set marks back to calculate. The mark then appears in **black** as if the overridden mark never occurred.

Academic Marks → **Definition**

Academic marks are calculated with or without category weighting. Blanks are not included in the calculation but zeros are. Ignored scores are not included in the calculation. If score dropping is turned on for a given category, the system dynamically excludes the score(s) that will hurt the student's mark the most. If category weighting is being used and one or more categories are empty, a reasonably accurate mark will be calculated based upon the categories that are not empty. If there is not enough information to calculate a mark, no mark will be shown. Extra credit is defined simply as points above points possible (points possible can be zero). A student may earn more than 100% overall.

Citizenship Marks → Definition - H (Honors) - 90, S (Satisfactory) - 70, N (Needs Improvement) - 50, U (Unsatisfactory) - 0

Citizenship marks are based upon an accumulation of citizenship items to which are assigned positive or negative values. Each student begins with a preset starting value. When a student has a citizenship item, the assigned value is added to the starting value to determine the student's citizenship mark. If there is no citizenship item, the starting value, previously set up, determines the mark without you having to do anything. Citizenship marks can be overridden on the Grades tab.

Show Inactive / Hide Inactive → option on the menu bar in grade book

The grade book assumes that you don't want to see students in your list who are not currently enrolled in the class. If you wish to include *inactive students in your list, click on Show Inactive on the menu bar. Be sure to save before changing to this screen or you will lose any work you have entered since you last saved. Once the screen refreshes, the button will change to Hide Inactive. Simply click on the Hide Inactive button once again to hide the *inactive students who have exited your class.
